**Warning**

1. Do not disassemble the panel light or touch the interior with metal objects to avoid damage;
2. Do not store the panel light in dusty or wet environment to avoid damage;
3. USB interface is reserved interface, please use it according to the specified environment of the company's related products, not for other purposes, so as not to cause loss;
4. Do not connect the output device of the DMX signal in the panel light network when using the mutual control function of the panel light, otherwise the function can not be used normally;
5. Only use the light in the temperature range of -10°C-40°C.
**Overall Dimension**

1. Front View:

   ![Image of PL-S150D Front View]

   - ① Diffuser
   - ② Fasten knob
   - ③ U-Bracket
   - ④ DMX OUT
   - ⑤ LCD

2. Back View:

   ![Image of PL-S150D Back View]

   - ⑥ DMX OUT
   - ⑦ USB
   - ⑧ York connector
   - ⑨ Dimmer adjusting knob
   - ⑩ Color Temp adjusting knob
   - ⑪ Power switch
   - ⑫ DC IN 12-36V
   - ⑬ Battery plate

**LCD Information**

Take the "CCT=5600K, Dimmer=100%, DMX address: 008 (Group address: 8)" for example:

![Image of DMX Mode]

- ① DMX 008
- ② Dimmer 100%
- ③ Color 5600K

![Image of Dimmer Setting Interface]

- ④ Dimmer 100%
- ⑤ DMX 008

![Image of Group Mode]

- ⑥ Group 8
- ⑦ Color 5600K

- ① Current Mode—DMX Mode
- ② Current Dimmer value
- ③ Current Color value
- ④ DMX Address
- ⑤ Black Shading - The current setting bit of the parameter
- ⑥ Current Mode—Group Mode
- ⑦ Group Address

Usage

1. Install
   1.1 Accessories Installation
      1) Barn Door/Honey Comb
         Adopt quick release design, press the accessories(Barn Door/Honey Comb) into the frame angle for normal using.
      2) Safety Ring
         The upper and lower frames of the lamp body are designed with mounting holes for safety rings. The Safety rings can be used normally when tightened according to the requirements.
   1.2 Light Installation
      Mount the lamp head onto a light stand, then fix it in place by tightening the T-Handle on the mounting column. Then loosen/tighten the handbrake locking mechanism on the yoke to adjust the tilt of the fixture.
      Tips: The upper and lower sides of the lamp body are designed with safety ring mounting holes. Please use the safety ring and safety rope when lifting the lamp.

2. Power supply and usage
   This product supports battery, power adapter two power supply mode.
   2.1 The installation of batteries
      1) Installation
         Connect the battery to the battery plate. When you hear a click sound, the battery installation is complete.
      2) Disassembly
         To remove the battery, press the unlock button of the battery plate and move the battery in the opposite direction from that when it is mounted.
   2.2 The installation of power adaptor
      1) Connection
         Align the protruding part of the female XLR at the DC output end of the adapter with the notch of the DC socket, insert the XLR into the DC power interface, and hear a "click" sound to complete the effective connection between the power adapter and the lamp cap.
      2) Disconnection
         The power adapter is separated from the lamp holder by holding down the convex part of the female XLR at the DC output of the adapter and pulling out.

3. Parameter setting and usage
   3.1 Intensity & Color Temperature setting and usage
      Rotate Dimmer/Color knob (Fig. 4. ③/⑤) to adjust the intensity and color temperature, the setting range are below:
      - The setting range of Intensity: 0%-100%. Minimum setting step is 1%.
      - The setting range of Color temperature: 2700K-6500K. Minimum setting step is 50K.
   3.2 Communication mode setting and usage
      The communication mode of this light including: DMX communication mode. Group communication mode.
      - DMX communication address range: 001-512;
      - Group communication address range: 1-8

3.2.2 Group Communication Mode
   1) Parameter setting
      Press the Color adjustment knob (As shown in FIG. 4. ⑧) to make the current communication mode of the lamp set to Group communication mode (as shown in FIG. 8), and press Dimmer Enter the Group address setting interface (as shown in FIG. 10) and turn the Dimmer adjustment knob to set the Group address. Press the Dimmer adjustment knob (As shown in FIG. 4. ⑧) or stop the operation and wait for about 5 seconds to exit the communication address setting.
   2) Usage
      Set the Group address of the product according to the expected demand, set the lamps to be controlled into the same Group address, and set the lamps through DMX Network, can be used normally, do not distinguish between primary and secondary.
      Tips: When using the Group function of lamps, do not access the output device of DMX signal in the network of lamps, otherwise this function cannot be enabled normally. To use.

4. USB interface usage
   USB port (Figure 4. ②) is a reserved port, please use according to the specified environment of the company's related products, can not be used for other purposes, in order to avoid losses.
